

Dear Valuable Customer,

We are contacting you regarding current situation with new classification and labeling change for Cormay hematology reagents. The classification for the following reagent has changed:

INDEX	PRODUCT NAME
8-891	FLUSH [500 mL]
8-832	FLUSH [1L]
8-896	FLUSH SET [12x17 mL]

In accordance with Regulation (EC) No 1272/2008 of the European Parliament and of the Council of 16 December 2008 on classification, labelling and packaging of substances and mixtures amending and repealing Directives 67/548/EEC and 1999/45/EC, and amending Regulation (EC) No 1907/2006 taking into account Adaptation to Technical Progress (ATP) to the CLP Regulation classified as a **dangerous good - UN number 3266, packing group III and class 8.**

In connection with the new classification, the following documents has been changed:

1. Material Safety Data Sheet
2. Labels

The dangerous good to be shipped need special packaging and "shipper's declaration for dangerous goods" crucial certificate for the transportation arrangement which are provided by PZ Cormay. New classification might have impact on the transportation costs.

In accordance with new classification of reagent as a dangerous good, the labels have changed. Please check if your Competent Authority should be notify.

The new classification is **applicable from November 2022.**

Our recommendation is to accumulate your orders on this product. Dangerous goods cannot be in the same order or shipped together with other reagents, for its special transportation method costs much more.

In case of doubts please contact your Area Sales Manager and Customer Service Representative (transportation) or Quality Assurance (labeling).

Magdalena Bondziul
Hematology Product Manager
